## 🎓 EDUCATION

**B.Tech in Computer Science & Engineering**  
Geetanjali Institute of Technical Studies  
9.3 CGPA

2020 – 2024  
Udaipur, India

## 💼 PROFESSIONAL EXPERIENCE

### Junior Software Developer

Secure Meters

10/2024 – present

- **Architected a Zabbix-based monitoring solution that reduced system downtime by 30%** by leveraging SNMP Traps for proactive, real-time alerting on critical application failures.
- **Revamped a core FTP application for Linux compatibility by integrating Renci.SSH and Fluent FTP**, enabling containerization with Docker and eliminating costly third-party dependencies.
- **Engineered a real-time service dashboard using ASP.NET Core and SignalR**, providing instant visibility into background processes and reducing manual verification efforts by over 90%.
- **Technologies:** C#, ASP.NET Core, SignalR, JavaScript, Razor Class Library, Redis, Docker, Zabbix.

### Graduate Engineer Trainee

Secure Meters

07/2024 – 09/2024

- Spearheaded the transition of **17 Windows-based applications** to Linux-compatible background services.
- Enhanced system performance by eliminating Windows service dependencies, accelerating deployment, and improving scalability.
- Designed and implemented a **Redis Pub/Sub** architecture for efficient, event-driven command execution.
- **Technologies:** C#, .NET Core Worker Service, Redis, Docker, Linux

### Last Semester Trainee

Secure Meters

01/2024 – 06/2024

- Developed a Windows application to automate and optimize the design, processing, and issuance of employee ID cards.
- Achieved a **57% cost reduction** by eliminating external dependencies and streamlining operations.
- **Technologies:** C#, .NET Framework

## 📁 PROJECTS

### Smart Asset Monitoring System

- **80%** cost of CSR reduction achieved through innovative engineering
- Reduced the net expenditure on CSR from **700Cr to 140Cr** of **Coal India Limited**
- A **100%** automated solution with no human intervention.
- Live tracking, Geo-tagging, and Maintenance of physical assets with real-time location

### Solar Based Smart Pet Feeder

- Built automatic pet feeder for pandemic-time, busy owners, enhancing pet health.
- **30%** decrease in pet health issues with regular feeding.
- Praised by **95%** of users for addressing the challenges of leaving pets at home.
- This machine provides food, water, and nutrients to pets, stray animals, and fish.
- A **100%** automatic system with no human intervention.

## 🧠 SKILLS

JavaScript | ASP.NET Core | Web Socket | OOPS | My SQL | PostgreSQL | Data Structures | C# | C / C++ | Docker

## 🏆 ACHIEVEMENTS

### 1st Rank in Smart India Hackathon

2022

### Kavach - Runnerup

Bureau of Police Research and Development (BPR&D)

2023

### SPECTRUM - Winner

Chandigarh University

2021

## 🏠 EXTRACURRICULARS

### Community Manager

Google Developer Student's Club

2022 – 2023

### Facilitator and Trainer

Internet of Things

2022

### Hackathon Organizer

Hack-A-Vishakar

2022
